Persian (Farsi) I can speak as good as a native speaker
English I can understand and speak, but sometimes a bit slow

CERTIFICATE

Java Script (Front end - Back End) development . 2017
Laitec . IRAN

COMMENT

My obsession is coding, a person who madly loves programming and developing new software with the latest technologies. I'm very interested to learn and teach new tools, tips, and tricks because I do believe that teaching is the best way to learn.

As long as I started my work in my own office in 2011 till now, I have always been thinking about the ways that help me to improve myself and enhance my abilities at work and now after eight years, I absolutely sure that I'm sitting on the right horse.

Because of the nature of our work, we have to keep ourselves up to date and fortunately, it's easy for me to learn new things, so I've learnt a variety of technologies in these years, from Database to Project management.

As you can see in my work experiences, I was the manager of our ESB system in SPMCO*. In a nutshell, this system manipulates, validates and saves all correct data, from all branches in all around the country to the servers of headquarter office.

At last, I can say, I'm optimistic, energetic and interested in team working who loves to be on the edge of technology.
